### WINES & SPARKLING WINES\*

A curated selection of labels, carefully chosen to pair with our dishes.

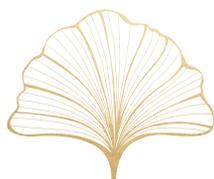

In the Blue Zones—those regions of the world known for longevity and the highest concentration of centenarians—wine is part of the gastronomic culture. On the island of Ikaria and in Sardinia, it is consumed daily, in moderation, always paired with food and enjoyed in good company, fostering conviviality.

It is important to note that scientific evidence indicates there is no safe level of alcohol consumption. For this reason, choosing to drink should always be a conscious decision, within the framework of a balanced, wellness-oriented lifestyle.
